

Chilled Water Filtration - Las Vegas Casino

When it comes to Puroflux filtration; more often it is the cooling tower or open loop which is given first consideration.

Puroflux also manufactures specially designed sand media filters to work on closed loop applications (chilled and hot water).

The PF-50 series utilized a dual valve tree arrangement to completely isolate the filter as it changes between filtration-to-backwash modes. Utilizing an external backwash source; the filter does not expose the closed loop to atmosphere.

A Las Vegas casino was having challenges with debris in their chilled water loops after some recent expansion. Working with Mechanical Products NV, Puroflux was able to customize packages to meet the customer's specific space requirements without sacrificing flow.

Please contact your local Puroflux representative (www.puroflux.com/rep-locator) for more information.

If you have any installation photos or success stories to share; please send to djamison@puroflux.com.
